

Good afternoon New Haven Residents:

Please see below

Water shut off

- Monday, March 10 water to the community will be shut off from 11 AM until 4 pm while they repair building shut off valves on 11th Cir.
- Tuesday March 11. The water line that is leaking out of the ground on Highland Avenue north of New Haven Rd will be fixed on Tuesday 11 Mar. The water will be shut off during the day from around 8 AM till about 4 PM at the latest. A good way to deal with the water being off is to fill up your bathtub with water before hand then use a bucket to dip water out of the bathtub to use around your place; clean dishes, flush the toilet with etc..
- Water was shut off by the water company on Wednesday March 5 late morning and back on early afternoon. We were not aware they were going to shut the water off or we would've notified the community as we have in the past.
- Work orders. The email work format is working well. If you see anything that needs attention, please use that method to notify Ameritech .

Thank You
